Nail sticker

What is UV gel nail polish stickers?

1. Gel nails are not ordinary plastic nail stickers. They are made of gel nail ingredients, which are brighter after lighting and are environmentally friendly.

2. Gel nail stickers all have environmental protection.

3. Gel nail wraps are self-adhesive and can be stick on nails directly.

Feature

1. They are stickers made of real liquid gel and cured (or finalized) by 60%.

2. They are made of flexible and wearable material in order to fit most nail shapes and sizes.

3. After placing them on your nails and curing the remaining 40% with a UV lamp, the gel will completely harden, and the effect will be like applying colorful nail polish in a nail salon.

HOW TO USE

1.Remove the protective seal.

2. Clean the aging cuticle with the alcohol pad.

3. Select a sticker that fits your nail size.

4. Attach the bottom of the sticker away from the cuticle line.

5. Attach the cuticle line and the side of the sticker to the nail with the enclosed wooden stick.

6. It's convenient to remove excess part of the nail edge using nail clippers.

7. Use the nail file to trim the excess part of the nail sticker edge at an angle of 90 degrees.

8. Use the UV lamp for 60 to 90 seconds and then it's done.
